

Hüseyin Selami ŞENER

Certified Public Accountant and Financial Advisor (CPA)

mmselemisener@hotmail.com - He was born on July 21, 1963

Professional Profile

I am an experienced Certified Public Accountant and Financial Advisor (CPA) specializing in finance and accounting, with a strong customer-oriented approach and a commitment to delivering innovative financial solutions. I develop strategies that help businesses manage their financial processes effectively and efficiently, strengthen their financial structures, and achieve sustainable growth objectives.

I have extensive experience in tax planning, accounting process management, financial reporting, and financial consultancy. By considering the specific needs, operational structures, and industry characteristics of each business, I provide tailored, practical, and results-oriented solutions for my clients.

By closely monitoring current legal and financial regulations, I ensure that businesses operate in full compliance with applicable legislation. I also contribute to reducing financial risks, improving the efficient use of financial resources, and strengthening strategic decision-making processes.

As a financial advisor committed to professional ethics, with a solution-oriented mindset and strong communication skills, I consider protecting the security and confidentiality of my clients' financial information and providing reliable, transparent, and sustainable advisory services among my highest professional priorities.

Core Competencies

- Maintain clients' financial and accounting records accurately, systematically, and in full compliance with applicable legislation.
- Prepare, analyze, and interpret financial statements to provide comprehensive assessments of companies' financial positions and performance.
- Prepare and submit tax returns accurately and on time in accordance with relevant tax legislation and regulatory requirements.
- Monitor national and international tax regulations to ensure clients' full compliance with legal and financial obligations.
- Conduct income and expenditure analyses to evaluate financial performance and develop strategic recommendations for improving profitability and operational efficiency.
- Provide professional financial and accounting consultancy services and develop customized financial strategies aligned with business objectives.
- Perform financial risk analyses to support clients' investment, financing, and strategic decision-making processes.
- Plan and manage audit processes, ensuring the accuracy, reliability, transparency, and regulatory compliance of financial reports and accounting practices.
